Chapter 10 : Operationalizing Pytorch Models into Production

```
[[-9.35050774e+00 -1.20893326e+01 -2.23922171e-03 -8.92477798e+00
  -9.81972313e+00 -1.33498535e+01 -9.04598618e+00 -1.44924192e+01
  -6.30233145e+00 -1.22827682e+01]]
```

Tracing	Scripting
• Dummy input is needed. • Records a fixed sequence of mathematical operations by passing the dummy input to the model. • Cannot handle multiple control flows (if-else) within the model forward pass. • Works even if the model has PyTorch functionalities that are not supported by TorchScript (`https://pytorch.org/docs/stable/jit_unsupported.html`).	• No need for dummy input. • Generates TorchScript code/graph by inspecting the `nn.Module` contents within the PyTorch code. • Useful in handling all types of control flows. • Scripting can work only if the PyTorch model does not contain any functionalities which are not supported by TorchScript.
